

*AirTouch2*

Being in the air conditioning industry for over 20 years has made us well versed with our customers' heating and cooling needs. This is what prompted us to create a high quality system offering complete control of your ducted air conditioning.

## *Introducing AirTouch 2.*

## *Comfort at Your Fingertips*

In this day and age, air conditioning has superseded its primary role of providing cool or hot air to a particular area. The process of altering the properties of air to provide comfort to an occupied space, be it a building or vehicle, has gone above and beyond its main purpose with the invention of various hi-tech tools used to control airflow.

Traditionally, remote controllers are used to manage the temperature in your home or office. But today, the AirTouch 2 promises you complete control over the air flow and comfort levels in each room individually. You are now able to adjust the air distribution to any room(s) you choose for maximum efficiency and cost savings.

Equipped with an integrated system which enables you to control your air conditioning unit using a smart phone or tablet from anywhere, anytime, the AirTouch 2 will be your new best friend. It is designed with your convenience in mind and all you need is WiFi or 3G/4G network and you're all set! What all this means is that each and every room will be at the desired comfort level that you want at all times. How's that for convenience? Now the whole family can enjoy their own comfort, although they are in different rooms.

## *Touchscreen – the Wow Factor!*

If you're worried that our creatively-designed wall monitor will be intimidating to use: **Don't!** Our 5"x 4" display screen is straightforward and easy to use.

There are two main features – the Unit screen which consists of the different modes and fan speed where you can select based on your preference; and the Zone screen for the different areas of your home where you can adjust the air flow in 10% increments. We've also included a Help button just in case.

## *Why use the AirTouch 2?*

The AirTouch 2 was created to allow you to be able to control two units, and up to 16 zones from a central point in your home which promises cosiness and can save on energy as it allows you to heat or cool only the rooms you are using. Basically, you can have your room just the way you like it, anytime of the day. The AirTouch 2 also enables you to customize the wall monitor to suit your lifestyle.

## *Save Energy | Save Money*

By using AirTouch 2 to control airflow and turn off zones not in use, you can avoid wasting energy on heating or cooling rooms you are not using. Without zoning technology, a central air conditioning unit cools or heats the entire house. This means that every room receives the maximum amount of air, regardless of room size, or how many people are using (or not using) that room. AirTouch is an energy saving solution to the problem that can help save you money in the long term.

## *AirTouch 2 App for complete 'Anytime, Anywhere' Control*

If that wasn't enough, we've also created the AirTouch 2 phone app for Android, iPhone and Tablet users, just to make life a little bit easier for you.

This is so you can have total control of your home air conditioning unit from wherever you are, as long as you have internet access.

## Features

- Full control of your system from anywhere, anytime using WiFi or 3G/4G\* with any mobile device.
- Provides On/Off control for most major brands like the previous AirTouch.
- Full air conditioner control of most major brands
- Control up to two AC units in the same system. The two AC systems can have separate duct systems or share the same system.
- Control up to 16 zones.
- Better resolution and improved response from the touch screen.
- Adaptive interface for different installation scenarios:
  - No AC control
  - One On/Off AC control
  - Two On/Off AC control
  - One full AC control
  - Two full AC control
- New phone app with full AC control functionality which can be used using home WiFi network or via Internet (away from home).
- Simplified access for Internet control:
  - Zero setup on the home router.
  - No registration process is required for control using the Internet.
  - Password is remembered for ease of use.
  - Able to control multiple systems in different locations.
- The names of each zone in your home can be personalized on the wall monitor and phone app.
- In built with Turbo zone function for when you have parties.
- 5-1-1 On/Off Timer Program.
- Periodic service reminder.
- Ideal for new and existing homes.

\* WiFi and internet access will depend on router

## Benefits

- Stay in control of your home comfort from anywhere, anytime.
- Easy to use, intuitive and friendly user interface.
- Stylish integrated controller.
- Flexible air control to ensure maximum comfort.
- Programmable to suit your lifestyle.
- Immediate comfort at a simple touch.
- Peace of mind for your ideal home comfort system.

## Convenience at its Best!

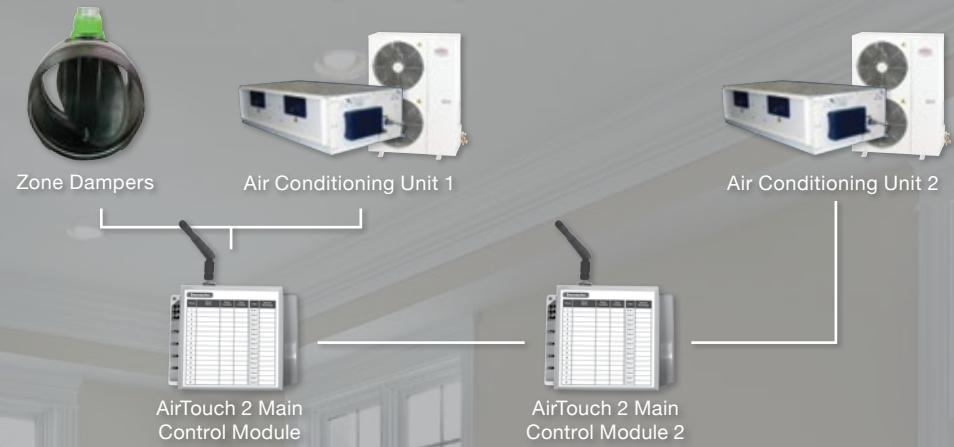

These are just a few reasons why you should consider the new AirTouch 2. If you need more information, please contact us at Polyaire and we'd be happy to share with you other reasons why we think the AirTouch 2 is the ideal solution when it comes to your air conditioning.
