Ideal Application Area**	m²	Min 11 - 20	Min 11 - 24	Min 13 - 30

How do Rinnai Portable Air Conditioners work?

- Air from the room is drawn into the air conditioner, cooled by refrigeration and blown out the front grill.
- Hot air is blown outside through the exhaust hose, using the window kit supplied with the air conditioner.
- Hot air must be exhausted outside the room being cooled, or you will not cool the room.

Which model is right for me?

It's important to choose model is right for you! The room conditions should be considered when selecting your Rinnai Portable Cooler. For best performance, the cooler should be in a well insulated and sealed ground floor room with external walls facing east and/or south.
For further information call **1300 555 545** or visit **rinnai.com.au**

* Climate conditions where high humidity is present may require drainage.
** Product must be operated in accordance with minimum room size requirements as detailed in the owners manual
